

## REDUCED SCALE IN HOME

Scale Buildup in your Home can be Time Consuming to Remove from Showerheads, Sinks and Faucets.

Installing a **Merus Ring** in your Home will:

- ✓ Greatly **Reduce Scale** in Dishwashers, Water Heaters and Home Boilers.
- ✓ Reduce or **Eliminate** "Rotten Egg" Smell from the Water.
- ✓ Make Shower Stalls, Sinks and Fixtures **Much Easier** to Wipe Clean Without Any Harsh Chemicals.

Water Treatment  
for the Whole  
Farm with the  
Merus Ring

## STORAGE TANKS & LIVESTOCK

Algae and other Bio-Film Build-up Results in Many Hours of Cleaning Troughs, Tanks and Equipment.

With a **Merus BIO Ring** you will find:

- **Reduced Algae** Growth in Cisterns, Nurse Tanks and Watering Bowls.
- Livestock will Consume More Water Therefore **Reducing Feed** and **Improve Overall Health**.
- **Reduced Rusting** Inside Piping, Tanks and Watering Systems.

## WHAT IT DOES

The Merus Ring is an Innovative Water Conditioning Device that is Easily Installed Around Water Pipes Without Any Modifications or Changes to Existing Lines.

Once Installed - the Merus Ring Begins to Reduce:

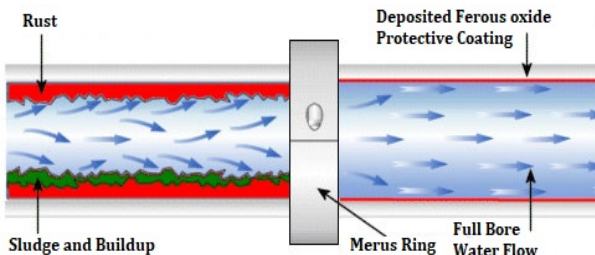

- Scale Deposits
- Rust and Corrosion
- Algae and Bacteria (Bio Film)

## HOW IT WORKS

Once installed - the Merus Ring Begins **Emitting Molecular Oscillations** that are Transferred to the Water.

These Oscillations Change the Properties in the Water, **Reducing Surface Tension and Increasing the Solubility** of the Lime Scale, Rust, Bacteria and Algae in the Water.

This Means, these Substances are Not Deposited in the Pipe, but Rather **Flushed Out** in the Water.

## BENEFITS

- **REDUCE** Scale Build Up on Spray Nozzles, Irrigation Systems and More.
- **REDUCE** Rust and Corrosion in Pipes Tanks and Pumps.
- **REDUCE** or **ELIMINATE** Unpleasant Bio Film from Water Fountains and Pools
- **REDUCE** Chemical Usage for Treating Water
- **INCREASE** Efficiency in Fertilizer and Pesticides due to Better Solubility
- Livestock Drink **MORE** Water and Require **LESS** Concentrated Feed

## ADVANTAGES

- Simple and Inexpensive Installation
- Zero Maintenance Costs
- No Chemicals or Electricity Needed
- Existing Scale is Softened and will be Flushed Away
- Less Time Spent Cleaning Tanks, Spray Equipment and Irrigation Equipment

## IRRIGATION & SPRAYING

The Increased Solubility of the Water Also Increases the Performance of Pesticides and Fertilizers.

Herbicides - such as Glyphosate - will not get Tied up with Other Minerals and will Therefore Reach the Weeds More Efficiently, **Increasing Performance**.

Fertilizers Stay **Dissolved Longer** Getting Carried Deeper into the Soil to the Root Systems where the Plants Need it.

Scale and **Chemical Buildup is Greatly Reduced** on Nozzles Helping them Perform Better by Spraying More Evenly - Longer.

## INCREASED EFFICIENCIES

- › Water Heaters
- › Heat Exchangers
- › Sprayers
- › Irrigation Systems

- SIMPLE -

- INEXPENSIVE -

- ZERO MAINTENANCE -
